Dear Professor Chen,

I am writing to express my interest in the Master's program in Computer Science at Ritsumeikan University. I have been following your research on Ladder Fine-tuning approach for SAM integrating complementary networkAuthors, and I am particularly interested in your work on using ladder networks to improve the performance of self-attention models.

I have a background in computer science from Mehran University of Engineering and Technology, where I earned a Bachelor of Engineering in Computer Systems Engineering. In my undergraduate studies, I developed a strong foundation in the core areas of computer science, including data structures, algorithms, operating systems, and computer architecture. I also gained experience in machine learning and natural language processing through my coursework and research projects.

I am confident that my skills and experience would be a valuable addition to your research group. I am a highly motivated and hard-working student with a strong passion for research. I am also a quick learner and I am eager to take on new challenges.

I have attached my resume for your review, and I have also included a link to my portfolio website. I would be grateful for the opportunity to discuss my application further with you.

Thank you for your time and consideration.

Sincerely,

Muhammad Ishaque
